

TECHNICAL ANALYSIS

OVERVIEW

Learn how to apply Technical Analysis as a standalone investment and trading methodology or as an addendum to fundamental analysis using tools that are based on price action and other technical principles. Technical analysis is important to understand the theory of investment and trading in markets. This Program is focussed on defining and applying momentum indicators to make buy and sell decisions. Instead of simply explaining and illustrating popular indicators like moving averages, RSI, MACD and stochastics, we review historical back tested results of each indicator so that you can objectively evaluate their performance.

WHO WILL BENEFIT FROM THIS?

Students | Investors/Clients | Traders | Sub-Brokers/Dealers | Working Executives | Other Financial Intermediaries | Any person who is interested in the technical analysis
